

FACTWARE F-series
Remote Monitoring and Control Software

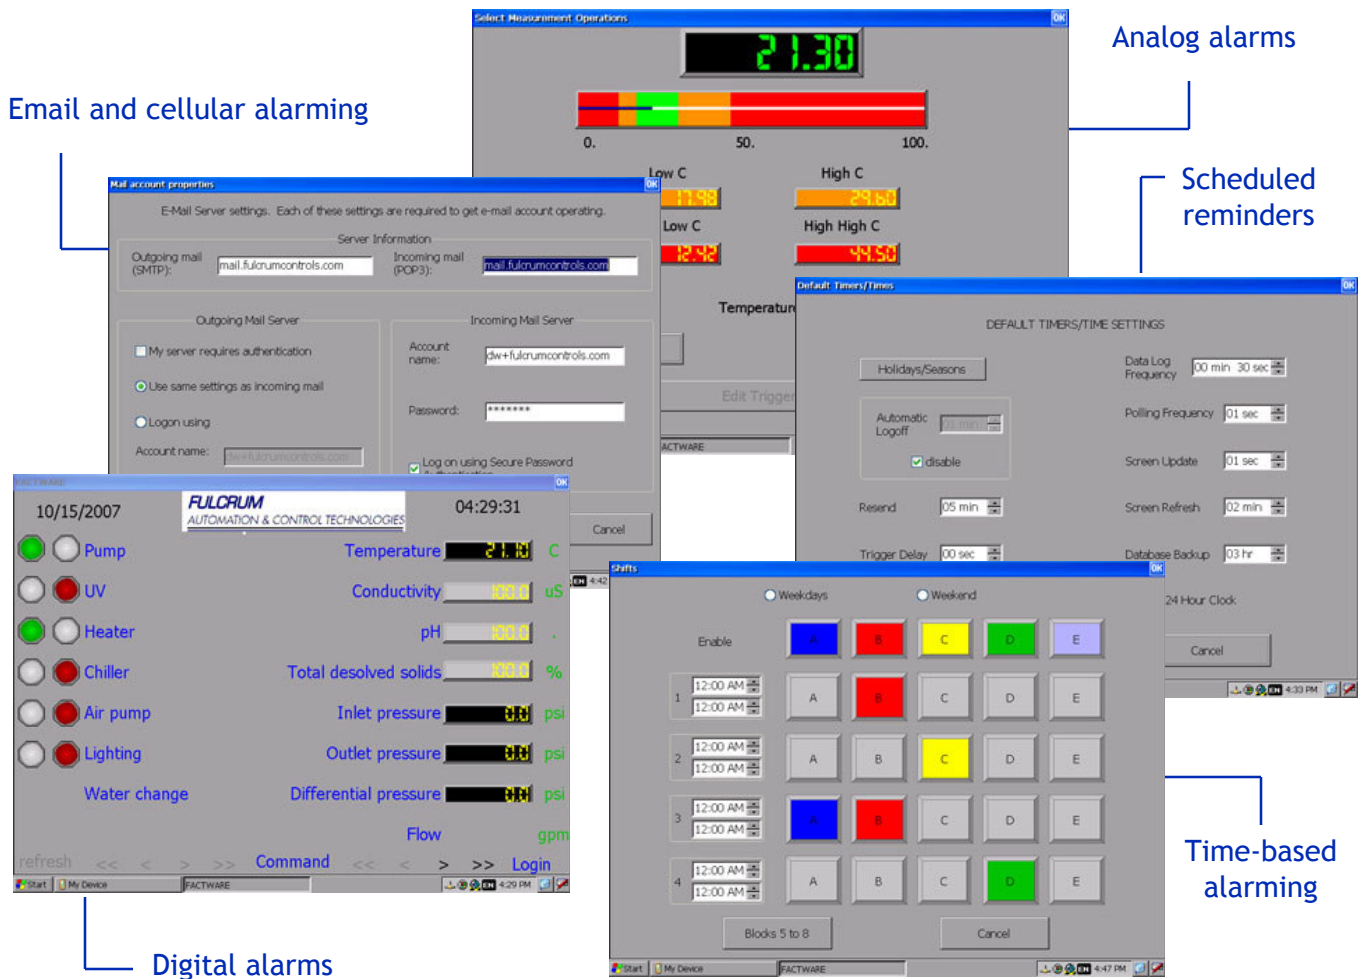

Give Your Equipment I/O a Voice
With Easy, Effective 24/7 Remote Monitoring

Stay tuned in... no matter where you are:

- Monitor and alarm up to 256 digital and analog I/O
- Alarm directly from your control systems to your cell phone
- Choose who gets notified for each event alarm—and when and how
- Send on/off controls remotely to remediate critical emergency situations
- Set up timers to turn your outputs on/off at specified time intervals
- Use conditional logic to track and diagnose complex, multivariate events
- Notify up to 64 users per alarm event anytime, anywhere
- Securely access and configure your remote system online
- Log, archive, and automatically upload your system data to FTP servers

Digital I/O: 5V DC, 24V DC, 120V AC, PLC Bit output control and more
Analog inputs: 10V, 4-20 mA, Thermistor, RTD, 3-phase power and more
PLC protocols: Modbus, PROFIBUS, CANOpen, DeviceNet, ControlNet,
Ethernet TCP/IP, Serial (RS232/RS485) and more.

Wireless alarming has never been so easy—and effective:

- No special communication hardware and client software needed
- Easy to understand, easy to learn, easy to use (all in plain English)
- Takes minutes to configure, not days (no programming)
- Secure: 256-bit encryption, 4 levels of user privilege
- Meets CFR 21 Part 11 and other Federal and state regulations

FACTWARE: Harness your plant data 24/7™
Get it to the right people, right away, no matter where they are.
